Protect your staff and customers in compliance with limiting people traffic in retail and industrial locations

Automated and manual counting and visual prevention of people entering and exiting commercial and industrial areas

Easy-to-Implement Capacity and Density Management of People Solution

Banner Engineering's occupancy monitoring solution supports social distancing initiatives by making it easy to control the flow of customers through stores, restaurants and

industrial sites.

- Automates the monitoring of entrances and exits
- Provides familiar green/yellow/red indication to customers
- Installs quickly with no alterations to infrastructure
- Notifies staff as customer count approaches capacity
- Offers optional reporting to identify trends in customer traffic

More info and other solutions can be found at: <https://www.bannerengineering.com/us/en/solutions/safe-work-solutions.html>

Sensors at entrance/exit increments up for people entering the store or factory location

Values shared with other locations

Sensors at entrance/exit increments for each person that leaves the store or factory location

Traffic light indicates if the next person can enter.

Signal can be replicated to multiple entrances.
